# About Chamber Membership

The Midstate Chamber of Commerce, a membership-based organization, supports businesses at every stage of growth in central Connecticut. We are an independent not-for-profit 501(c)(6) organization founded in 1896, separate from city and governmental entities. Our activities are bipartisan, not affiliated with any political party.

Our members include companies in manufacturing, education, technology, healthcare, communications, restaurant and hospitality, transportation, retail, and business services and are all sizes, including solopreneurs and retired individuals. We have non-profit and for-profit representation on our Board of Directors.

The Midstate Chamber of Commerce leadership strategically guides our initiatives and supports our members, as they are integrally part of the community themselves as stakeholders. As a trusted resource, we refer companies to services, entrepreneurs to funding partners, students to mentors, and the public to local, trusted businesses that make up our membership.

The Chamber focuses on four pillars to drive our program of work:

- Advocate
- Educate
- Promote
- Connect

Our committees plan programming and events throughout the year. We partner with community organizations to host job fairs, seminars, and business expos, while helping to extend the reach of members' marketing efforts through digital/print campaigns.

## Sharing Resources Helps Members Meet their Goals

We eagerly welcome opportunities to partner with organizations throughout the business community. Some examples include:

- CEDF (Community Economic Development Fund)
- Workforce Alliance
- U.S. Small Business Administration
- Connecticut Department of Economic and Community Development
- Meriden Economic Development Corporation (MEDCO)
- SCORE (Service Corps of Retired Executives)
- The Meriden Daffodil Festival
- The City of Meriden's Economic Development Department
- The Black Business Alliance
- SAMA (Spanish American Merchants Association)

# Nutmeg State Chamber Alliance

In 2019, The Midstate Chamber of Commerce and Hamden Regional Chamber of Commerce created the Nutmeg State Chamber Alliance - the first of its kind in Connecticut. This partnership is not a merger, but rather, a concerted effort to best support individual chamber members on both a local and a regional basis. With a combined membership of over 900, we have a greater impact both on the state business climate and with elected officials on the local, state, and federal levels.

This unique model retains the local Chamber's Boards, Presidents and Staff while establishing a new Alliance

Board made up of representatives from both organizations. The model also creates an opportunity to best support our member businesses of all sizes.

Highlights include: continued focus on local activities and businesses, more opportunities to connect (individuals and businesses), greater outreach to more markets, many combined events, activities, committees, increased advocacy

<https://www.midstatechamber.com/membership/nutmeg-state-chamber-alliance/>

and influence, more in-person interaction to grow our businesses, and larger geographic region in which to work. Currently over 200 members have a dual membership and are taking advantage of all that the Alliance has to offer!

Members enjoy reduced rates to join each chamber, allowing for even more exposure for their business! Visit our website to learn more!

## Areas we Serve: Meriden, CT

The town of Meriden was founded in May 1806 and became a City in June 1867. Meriden was originally part of Wallingford. In 1727 it was granted a separate meetinghouse, named for the town of Meriden, West Midlands, England. Myth has it that it was named after the Merry Den Tavern that was located near present day Route 5. The oldest house still standing is the Solomon Goffe house built in 1711. In the 1800's Meriden earned the nickname "Silver City" due to the large number of cutlery and related products which were manufactured here by several companies including International Silver and Meriden Cutlery. In 1785 the town of Berlin was incorporated, with history of purchases and settlements starting as early as 1659. In the middle of the 18th century, emigrants from Ireland set up the first winware business pedaling their wares from house to house. Therefore Berlin became the birth place of "The Yankee Peddler." In 1886, the State Legislature granted a charter for what became the Berlin Fair which is still held annually on the first weekend in October. The Town council-Town Manager form of government was instituted with a charter revision in 1995-96. Visit for more about Berlin, CT:

Berlin, Meriden and Wallingford have numerous community events throughout the year, including farmers markets, holiday events, and concert series.

### Real Estate and Neighborhoods

The civic vitality in the city is reflected in its various clubs, neighborhood associations, organizations and houses of worship. Countless opportunities exist for community service, worship, education, recreation and enjoyment.

Central Connecticut offers a wide variety of housing, from affordable rents, to reasonably priced condos to elegant homes in desirable, growing communities in which to start a new business or raise a family.

# Microsoft is *Eliminating* Print Drivers!

**Microsoft has identified that 9% of security incidents stem from the design of their current print architecture.**

Microsoft's answer is *Windows Protected Print* which seeks to address these major security vulnerabilities by eliminating third-party drivers, introducing a more secure, driverless print system and migration to cloud. This event will impact your network in significant ways...

## In our first two sessions, we covered:

- **What is Windows Protected Print (WPP):** A detailed overview of Microsoft's new, security-focused print standard—including how it eliminates third-party drivers, leverages IPP, and uses Mopria-based standards to transform how printing works in Windows environments.
- **Print Server Removal & Redeployment:** A walkthrough of how IPP printing eliminates the need for traditional print servers, plus step-by-step guidance on redeploying printers using PowerShell scripts, workstation tools, and best practices for print naming conventions.
- **Finishing Options & Print Support Apps (PSA):** An exploration of how WPP limits traditional finishing options like stapling or hole punch—and how manufacturers are releasing Print Support Apps to restore these features. We provided updates on PSA availability across vendors like Canon, Ricoh, Sharp, and Konica Minolta.
- **Workstation & Cloud Deployment:** Hands-on instruction for deploying WPP-enabled printers across large environments, including naming strategies, deployment scripting, and centralized management through Microsoft tools, Group Policy, and third-party print platforms.

The next session in our series will continue this momentum with updated vendor support timelines, emerging best practices from real-world deployments, and deeper dives into advanced WPP use cases.
